

FREQUENTLY ASKED QUESTIONS

Q: Does OCRBot require an internet connection?

A: Yes, OCRBot requires an active internet connection to communicate with Azure AI services. All processing happens in the cloud, ensuring you always have access to the latest AI models.

Q: How much does it cost to use OCRBot?

A: OCRBot is free software, but you need to pay for Azure AI service based on your usage.

Q: Can I process password-protected PDFs?

A: No, OCRBot cannot process encrypted or password-protected PDFs. You must remove password protection before processing.

Q: Is my data secure?

A: Your Azure credentials are stored securely using Windows Credential Manager with encryption. PDF files are temporarily uploaded to Azure AI services for processing and are not permanently stored by Microsoft.

Q: Why is Auto Tag processing so much slower?

A: Auto Tag uses AI to analyze document structure and generate semantic tags, which requires additional processing time. This typically adds 3-4x to the processing time but ensures PDF/UA compliance and accessibility.

Q: What should I do if OCR results are inaccurate?

A: OCR accuracy depends on input quality. Ensure your PDFs are scanned at 300 DPI minimum, pages are properly aligned, and text is clear. If issues persist, try re-scanning the original document with better settings.

Q: Does OCRBot fully remediate PDF documents for ADA compliance?

A: No. Manual remediation is required to make the documents fully compliant.

Q: Can the OCRBot tool automatically generate alt-text for images and pictures?

A: No.

Q: How do we confirm the accuracy of the OCR once it is done?

A: The only way to ensure 100% accuracy with the OCR text is to have a human compare the OCR'd text to the original.

Q: Can I edit the output PDFs?

A: Yes, output PDFs can be edited using standard PDF editing tools like Adobe Acrobat Pro.

Q: Where can I get help if I encounter problems?

A: Check the application logs (accessible via the Logs button), review this user guide, and consult the FAQ section.

Q: Can I use my own Microsoft Azure Cognitive Service Endpoint and Service Key?

A: Yes.
